

Crystal Liquid - 10,5 l

GENERAL

3080 0016

Dishwasher liquid for industrial machines.

- Powerful degreasing.
- Cleans hygienically.
- For automatic dosing machines.
- Safe to use in industrial machines.
- Nordic Swan Ecolabel.

Crystal Liquid is an ecological, strongly alkaline dishwasher detergent for professional use. Crystal Liquid can be used in single-tank and tunnel dishwashers. This product contains a combination of strongly alkaline ingredients and a readily degradable limescale remover for rapid removal of all food residues such as proteins, starches and fats. It prevents limescale deposits in the machine when used at the proper dosing level.. Crystal Liquid does not contain any colouring agents or perfumes. Crystal Liquid is free from chlorides and other halogens, phosphates and badly biodegradable phosphate replacements, and petrochemical-based surfactants. All ingredients from non-mineral origin are completely biodegradable.

pH	13,5
Cleaning Power	Super powerful

USAGE

Crystal Liquid should be dosed using an automatic dosing pump. For optimum cleaning results we recommend a concentration of 0.5 - 1.5 g / 1 liter depending on water hardness, machine performance and level of soiling. Attempt to wash full machines whenever possible. Avoid under or over dosing the detergent. Wash at the lowest temperature possible resulting in hygienic dishes. For best results we recommend using Crystal Liquid in combination with Crystal Rinse. Do not use Crystal Liquid on soft metals e.g. Aluminum. Keep Crystal Liquid in a frost-free location. Dispose of this product and its container in a waste collection center (according to local regulations). 100% recyclable packaging.

Only use this product for its specified purposes. If in doubt, first test the product in an inconspicuous area. Greenspeed is not responsible for any damages if the product is used incorrectly. Consult the Safety Data Sheet (SDS) for additional information.
