Toucan Eco III bio-cleaning

Toucan Eco III is a greener way to clean smaller facilities.

Electrochemical activation (ECA) offers the most effective, money saving and environmentally-friendly cleaning and sanitising alternative to synthetic chemicals, while helping to drastically reduce plastic waste.

Its components of water and salt, when activated, produce a solution which is non-toxic and non-hazardous to people and animals. Simply make your own solution.

Stringent tests undertaken by EU accredited independent laboratories and university research departments have shown it is 99.999% effective against all forms of microorganisms with a very fast contact time and virtually no regrowth.

Toucan Eco III is designed for small facilities. The kit includes a worktop activation unit, 1 litre container, measuring spoon, mixing rod, spray bottle and some salt to get you started.

Key features & benefits

Kills
99.999% of
microorganisms

Environmentally
friendly

Cost
effective

Non-toxic &
non-hazardous

- Fast acting with a 99.999% kill rate.
- A powerful disinfectant and effective cleaner.
- Environmentally friendly.
- Cost saving, only a small amount of salt combined with water needed.
- Non-toxic, non-hazardous.
- Meets the requirements of BS EN 1276 and BS EN 13697.

Where it's used

The solution is great for busy environments which demand a quick, effective cleaning regime, but especially where green credentials are important or harsh cleaning products aren't suitable.

Technical information

Capacity	1 litre
Concentration	60-80 ppm FAC
pH	pH7.8 - pH8.5
Time per batch	4 minutes
Max capacity	3x over 15 minutes
Salt consumption	2 grams
Power	27w
Additives	Salt (NaCl) and water (H ₂ O)
Active substances	Hypochlorous acid (HOCl) and sodium hypochlorite (NaOCl)
Accreditations	EU Biocide. BS EN 1276. BS EN 13697.
Efficacy	99.999%
