Toucan Eco Active Plus bio-cleaning

Toucan Eco Active Plus is the greener way to clean medium-sized facilities.

With Toucan Eco Active Plus one activation, which takes only 40 minutes, produces 20 litres of multipurpose disinfectant, which can be dispensed into bottles or buckets using either of the dilution dispensers.

Salt is dissolved in water and electro-chemically activated (ECA) by applying a small electrical current using a specialised electrolysis cell. This produces hypochlorous acid, which is an effective disinfectant, and sodium hypochlorite, a cleaning agent.

Together, they create a powerful, naturally-occurring disinfectant cleaner that's safe, non-toxic, non-allergenic, environmentally friendly, reduces plastic waste and saves money. You simply make your own solution.

Stringent tests have shown it is 99.999% effective against all forms of microorganisms with a very fast contact time and virtually no regrowth.

Key features & benefits

Kills
99.999% of
microorganisms

Environmentally
friendly

Cost
effective

Non-toxic &
non-hazardous

- Fast acting with a 99.999% kill rate.
- A powerful disinfectant and cleaner.
- Environmentally friendly.
- Saves money as only uses water and salt.
- Non-toxic and non-hazardous.
- Certified to BS EN 1276 and BS EN 13697.

Where it's used

The solution is great for busy environments which demand a quick, effective clean, especially where green credentials are important or harsh chemicals aren't suitable.

What's included

The system includes a generator, 5 litre tank, brine dispenser and shelf, high volume discharge nozzle for buckets and low-volume nozzle for bottles. Fixings for control panel and shelf are included.

Technical information

Capacity	20 / 40 litres
Concentration	50 / 100ppm FAC
pH	pH 7.8-pH 8.5
Time	40 minutes
Salt consumption	5 grams per batch
Power	100w
Additives	Salt (NaCl) and water (H ₂ O)
Active substances	Hypochlorous acid (HOCl) and sodium hypochlorite (NaOCl)
Accreditations	BS EN 1276. BS EN 13697. EU Biocide.
Efficacy	99.999%
