

**Mi-mop microfibre
disposable pad**

Dispose of after use preventing cross contamination, removing the need for costly laundry facilities and chemicals.

Mi-mop is designed to provide cleaners with a quick and effective method for the removal of 99.9% of bacteria without the need for chemicals, and prevents the cross-contamination of surfaces as you can mop and throw.

It is ideal for general floor cleaning using Robert Scott's standard flat mop break-frames or Uniko clip-frames where it effectively cleans away dirt, dust and microorganisms, but also excels in tasks where preventing cross contamination is of utmost importance, such as in hospitals.

How it's used

As a soft, low-linting microfibre pad it can be used dry on hard floors for dusting and rapid-response mopping or damp for chemical-free cleaning and, as it's disposable, it also can be used with hypochlorite solutions.

Key features & benefits

Microfibre
cleaning

Disposable

No chemicals
required

Use wet
or dry

- Microfibre cleaning effectively cleans away dirt, dust and microorganisms.
- Prevents cross contamination by cloth disposing of the pad.
- Requires minimal water and chemicals.
- Rapid response cleaning.
- Trim hygiene colour coded in red, green, blue, yellow and white.
- Suitable for hypochlorite solutions.

How it's used

Available in the four hygiene colours, as well as white for neutral applications, this low cost microfibre flat mop pad is available in packs of 50 pads and 10 packs in an outer.

Typical application

While the pad can be used in many applications its usage is particularly relevant where cross contamination is an issue and there is no access to laundry facilities.

User instructions

Break frame, fit, mop and dispose. Use damp for best results, dry for dusting.

Material

100% microfibre.
